

# SILICON VALLEY TRIAGE TOOL:

Predicting Costs and Improving Outcomes for the Most Vulnerable in the Community

**Functionality:**  
How the tool works

## Data

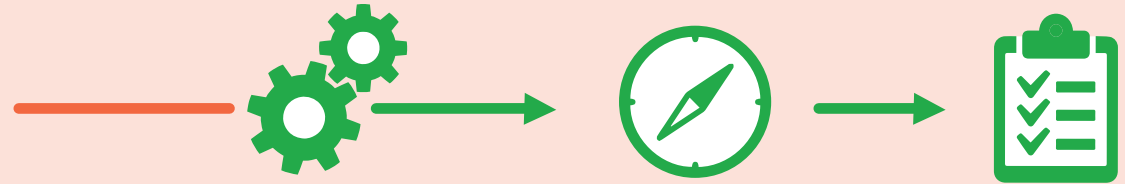

The Triage Tool analyzes system information for the **most vulnerable** in our community through **linked records** across departments in Santa Clara County.

## Predictability & Prioritization

The data is processed to create a **predictive score** for each individual.

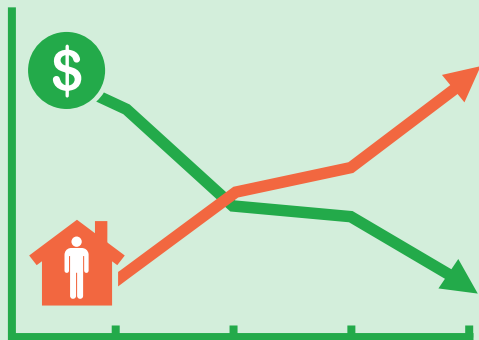

High cost users are identified with precision and **prioritized for supportive housing**.

**Results:**  
How it can make an impact

## System Efficiency

Using less resources and achieving better outcomes.

## Good for People

The most vulnerable individuals are housed with support services

## Good Government

Responsible public spending & effective system of care
